

**Cut-Vector**

**LLaMA 3**

```
def cut_vector(vector):  
    diffs = np.diff(vector)  
    idx = np.argmin(np.abs(diffs))  
    cut_idx = idx + 1  
    left_vec = vector[:cut_idx]  
    right_vec = vector[cut_idx:]  
    return left_vec, right_vec
```

**29% passed**

**GI**

```
def cut_vector(vector):  
    m = float("inf")  
    cut = 1  
    for i in range(1, len(vector)):  
        diff = abs(sum(vector[:i]) - sum(vector[i:]))  
        if diff <= m:  
            m = diff  
            cut = i  
    return (vector[:cut], vector[cut:])
```

**100% passed**
